#6 Scarsdale

Enrollment: 4,775
Household Income: \$291,542
Funding per pupil: \$29,251

82% Passed Math
74% Passed ELA

Success Academy is not technically a school district; it's a charter management organization that operates public charter schools.

Demographic data based on 2017 test takers in grades 3-8 from NYSED

Success Academy enrollment is from 2016-17 and enrollment from other districts reflects 2015-16 according to NYSED (most recent data available)

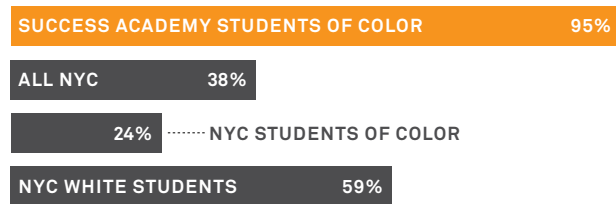

Ranks are calculated based on the average of pass rates in ELA and math

For Success Academy, household income is based on the median family income for the Census tract of every test taker. For other districts, household income refers to the median income for all families in the municipality, according to the Census

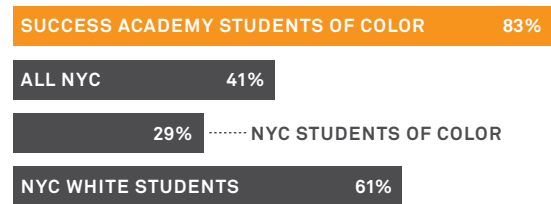

Success Academy Is a Lifeline for NYC's Students of Color

In NYC's highly segregated and unequal school system, most low-income students of color are concentrated in the city's worst schools, and tragically many never learn to read or do math. This year, 350,000 black and Hispanic district school students failed to pass the state exams. Yet, in these same neighborhoods — often in the same buildings — Success Academy students of color passed at dramatically higher rates — 95% passing math, 83% passing ELA — rivaling the city's top ranked schools in affluent white neighborhoods.

Math

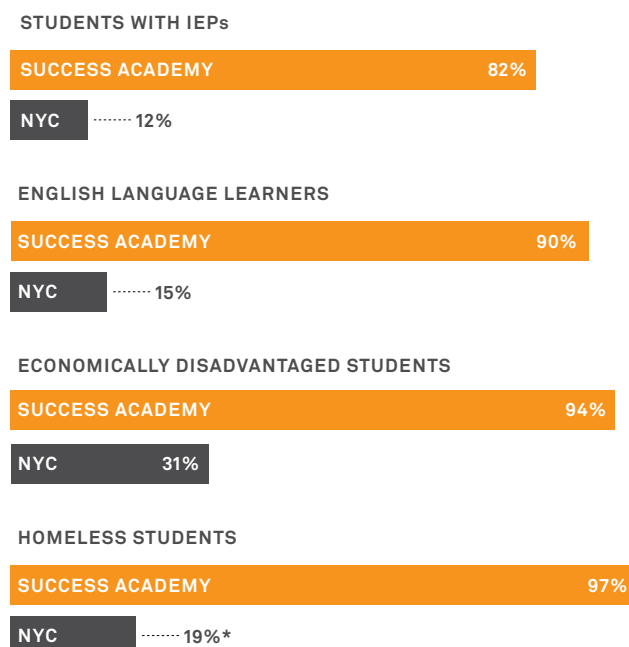

ELA

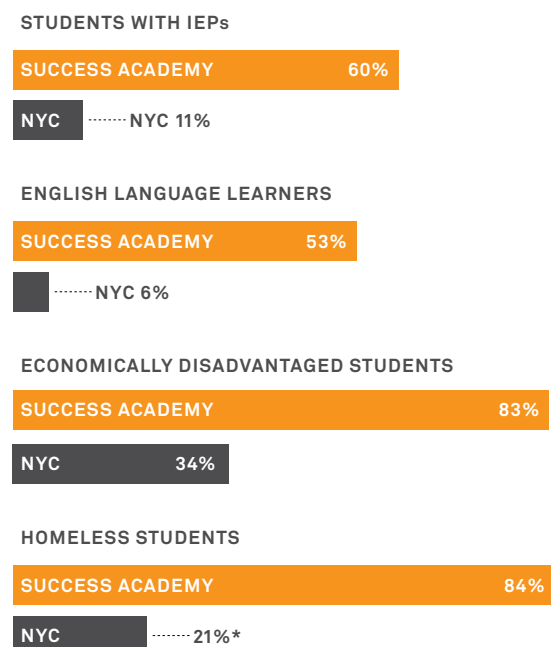

Closing the Gap Across All Groups

Success Academy's child-centered approach to education ensures that scholars from all demographics, as well as those with diverse needs and challenges, can achieve at high levels, far surpassing their district school peers.
